

**DENSIQ®**

**LEAK SEALING  
DURING OPERATION**

# DENSIQ® Group

## A complete partner within sealing solutions

DENSIQ Group is a leading European producer and supplier of sealing technology. We offer products within static, dynamic and rotating sealing solutions, as well as a broad range of connected services, including on-site machining and leak sealing during operation. DENSIQ Group works closely with the customer, allowing us to offer the highest operational reliability and minimise downtime.

Our brands

### Products

- Flat gaskets
- Graphite rings
- Expansion Joints
- Mechanical seals
- Hydraulic seals

### Services

- Leak Sealing during Operation
- On Site Machining
- Re-tubing
- Valve service and testing
- Installation and inspection

# Why Leak Sealing?

When an unexpected leakage occurs in critical processes and stopping production is no option, **DENSIQ** is the solution for you!

- › Costly shutdown of plant
- › No disruption to production
- › Eliminates environmental emissions
- › Protect your personnel and equipment
- › Longer lifetime on your equipment
- › Allows plant to keep running until a safe shutdown can be planned and a permanent repair put in place

- Example of an engineered DENSIQ box capsuling the leakages

# Tailored - Tested - Trusted

Every leak presents its own unique challenge — and that's what makes each of our designs truly one of a kind.

With decades of experience in creating tailored solutions for the industry, we've earned the trust of our customers through reliability, innovation, and deep technical expertise.

## **With thousands of installations worldwide**

DENSIQ have gained unique experience supporting leading companies in oil, gas and chemicals, power and energy, pulp and paper, and more.

Our global presence and long-term partnerships ensure reliable solutions across markets and industries.

# Training for tomorrow's Leak Sealing Challenges – Powered by Knowledge and Innovation

In order to remain a frontrunner in the field of leak sealing, Densiq Group continuously invests in personnel training and the development of advanced methods and techniques. As part of this commitment, Densiq Group offers specialized training programs in leak sealing to ensure the highest standards across the industry.

# Leak Sealing - Step by step

- › An unexpected leakage occurs in a critical process

- › Jour 24/7 service on site to measure and to evaluate the situation

- › Our design team selects the correct material and method to start in designing the sealing

- › Manufacturing of the sealing 24/7

- › Installation 24/7 in a safe, professional and time efficient way

- › Evaluation and documentation is handled together with the customer

**DENSIQ®**

Bringing peace of mind  
to your operation
