DENSIQ EcoLube IQ

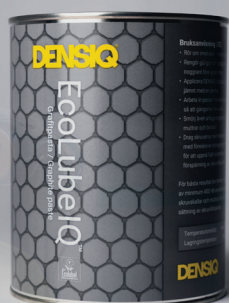

# DENSIQ®

## Why EcoLube IQ?

The first **EcoLabel-approved** thread sealant on the market

- DENSIQ® EcoLube IQ is based on graphite flakes and a natural vegetable base-oil, no petroleum based substances is allowed in the manufacturing process of DENSIQ® EcoLube IQ.
- DENSIQ® EcoLube IQ was developed to have the same lubricating properties as our regular DENSIQ® EcoLube. Tests according to ISO 16047 show the same low friction coefficient, an even lower spread in the resulting bolt load and an improved temperature range of the viscosity making it easier to apply.
- DENSIQ EcoLube IQ comes with DENSIQ's wide range of services, such as torque calculations, complete flange calculations according to EN 1591-1 and a technical training testing facility with torque equipment.

EU Ecolabel:
